

Govind Rao is an architect of over 35 years of experience. He graduated from college of fine arts & architecture, JNTU, Hyderabad in 1984 and did his Master's program in Infrastructure Planning, University of Stuttgart, Germany, in 1995. He was a recipient of Louis Kahn Trophy, NASA 1983, New Delhi, while doing his architecture and he stood 1st in Town Planning (Design) in Master's program. He worked with eminent architects like Sumit Ghosh & Associates, New Delhi and Sanjay Mohe (Chandavarkar & Thacker), Bangalore. He has work experience in Gulf as well. He was an associate Architect for the first phase of 'South City' group housing project, housing 10,000 people after completion. 'South City' was promoted by L & T and built with MIVAN technology. His works include houses, housing, hospitality, commercial and interior projects.

He Conducted Environmental Impact Analysis for setting up an Industry and township for Mercedes Benz near Stuttgart, Germany, and conducted studies of Socio-economic influences for extension of City of Izmir, Turkey. (both the studies as part of Master's program). He traveled extensively in Europe and India.

Apart from his architecture practice, he also teaches in prestigious architecture colleges in Bangalore and SIT, Tumkur, Karnataka.
