

Architect: Ravi Ramachandran

Graduate of the School of Planning and Architecture, New Delhi : B.Arch (1996)

Worked with Ar Brinda Somaya at Somaya and Kalappa Consultants (1996-2001)

Own practice from November 2001 onwards

Presently Chief Architect at Space Redefined, Bangalore

We are architects and have designed over 900 buildings across various typologies in our working experience of 30 years, in Bangalore as well as across India (in Kanpur, Delhi, Chennai, Hyderabad, Coimbatore, Ranchi, Bilaspur, Trichy and Mysore).

While we have numerous individuals in our contact list, we are also fortunate to count corporate entities such as ABB, Biocon, Cipla, Parle, OnMobile, Siesta Hospitality, Sona Group, Orchid International, Allen group, and Unishire, etc among our clients. We have designed, and are designing, multiple facilities for some of these.

We pride ourselves on our ability to propose innovative, practical design solutions, and to consistently exceed the client's expectations in terms of our design thought process, responsiveness, quality and cost-effectiveness

We are currently working on over 25 projects, in and around Bangalore.

I have also been a teacher for over eighteen years now, empowering and inspiring the next generation of architects by equipping them with design skills. In this context, I have been associated as a visiting faculty with the RV group of Institutions and the Dayananda Sagar group of Institutions.
