Event Name	Talk On “NEP 2020- Implications for Higher Education Institutions
Date	12th November 2022
Venue	Auditorium, DSATM.

Objective: Understand Present system and what NEP requires action at individual, department, Institute, state and central government level

Purpose: Create awareness about NEP-2020 and their preparedness to involve in the teaching - learning process.

About the Program:

NEP 2020 points out the urgent need for introducing Multidisciplinary approaches at the college and university levels. Multidisciplinary approaches would empower students, enhance the capability of human resources and pave way for accelerating the process of social, economic and environmental development and sustainability.

Isolating technical education from other social science disciplines or ignoring the contribution of social and behavioral sciences, business and management education could be a fatal attempt. Students may be good enough in data analysis but may severely fail to understand the reciprocal and mutually cohesive relationship between various disciplines of study and the larger society, including its environmental and economic systems. So, the NEP-2020 includes three important aspects relating to higher education: the regulatory architecture, university /institutional governance, and educational content which was clearly explained by the resource person.

“Plant more Trees, Save Water, Save Electricity, Avoid Plastics, The world is in your Hands”

Participants:

Faculties of DSATM

Measurable outcomes:

The outcome of NEP 2020 is providing a more flexible study route in the higher education sector letting students choose their academic journey, with the multiple entry and exit options, rather than conforming to the set standards. The 4-year UG degree programme will allow students to move towards more research-based learning as seen in the higher education structure abroad.
